

**“Diatom Cleaned Up  
Someone Else's Mess!”**

## **Diatom Enterprises**

Letter of recommendation

Dear Colleague,

I am Judy Celmins, the Director and Business Manager of Third Wave Media in Australia.

Software development was a new journey for us, and before commencing work with Diatom it was a very frustrating experience. You probably know how stressful the process can be!

Today we are energized by the quality of workmanship and professionalism of Diatom. We set for them a very difficult task of cleaning up someone else's mess, and they've come through, giving us renewed energy and confidence.

We worked with several developers before finding Diatom, and not one of them measures up to their skill and ease.

I highly recommend you contact them about your project, and to reduce the stress around creating your ideas.

Kind regards,

Judy Celmins
