

“Diatom engineers display a high degree of professionalism.”

Letter of Recommendation for Diatom Enterprises

To whom it may concern,

My name is Levi Strobe and I am a Team Lead and Software Engineer at Jiff. I am writing today about my recent experiences, but I have had in the past the pleasure of working with Diatom at other companies.

When Jiff had a need to quickly expand our team we initially had a hard time finding people to fill the developmental void. I did not hesitate to recommend Diatom to help us expand our team. Because of their reputation and my previous experience I knew that they could quickly ramp up and be impact players.

Over the course of a year we scaled up our Diatom team to four developers who were helping us with everything from architecture re-factorings, integrations, testing and API development to database tuning. In all of these endeavors each team member from Diatom rose to the challenge and delivered.

In my experience Diatom engineers display a high degree of professionalism and I am proud to have recommended them. Without them, Jiff would not have a successful long-term strategy. I will continue to recommend Diatom for their services and will look forward to working with them on future projects.

Regards,

Levi Strobe
Senior Software Engineer
